- Data Visualization
- MS Office

PROJECT

Superstore Sales Performance Analysis

- **Data Cleaning :** Cleaned and merged relational datasets (Orders, People, Returns) using Python (Pandas); handled missing values and standardized data formats.
- **Exploratory Data Analysis (EDA) :** Extracted key performance metrics including total sales (\$2.3M), profits (\$286K), and identified top 10 most profitable cities.
- **Tableau Dashboard :** Built an interactive dashboard featuring dynamic KPIs, region-wise sales donut charts, and sub-category performance filters.
- **Advanced Visualizations :** Programmed custom monthly trend lines and horizontal bar charts using Seaborn and Matplotlib to identify underperforming segments.
